

# The Night of Power

By: Amatullah K.

The special night which was a gift from **The Almighty** to the ummah of Nabi ﷺ. An esteemed guest that arrives in the long awaited month of Ramadhan. With it comes an unexplainably tranquil ambience. The treasured hours that are better than 1000 months. These moments are precious to those who believe. How fortunate are we to witness the abundant mercies of Ar-Rahmaan.

It was on this night that the **Quran Shareef** was sent down to our Beloved Nabi ﷺ. The Noble Quran was brought down to the Baitul Izzah- the muqaddas place on the closest heaven to Earth, directly above the Ka'bah Shareef, where the angels perform Tawaaf. The revelation of the Quran Shareef was chosen to be on this valuable night by Al-wahhaab.

Serenity lasting from the warm hours of sunset till the crisp hours of dawn. The light of the moon, illuminating all the darkness of the night. The weather is ideal; not hot, nor cold. The sun will rise looking more perfect than usual; round and smooth, with no rays around it.

The specific date of this night is kept a secret by Al-A'leem, for the reason that we would only perform Ibadah on that one night instead of us tirelessly trying to seek this blessed night. Allah Ta'ala praises His servants before His angels who worship on this night saying, "My servant does not know which night is Laylatul Qadr, but is striving for it. If he knew it he would strive even more." Indeed those chosen members of the Ummah are much more than lucky.

We cannot let the endless opportunities of this valuable night slip through our fingers, for its greatness is far more than we can comprehend. *A single second* of this Mubarak night should not be taken for granted. We have to supplicate, remember Allah, perform Salah, recite the beloved Kalam of Allah, all in abundance on this blessed night. On this night, Jibraeel **عليه السلام** descends along with other angels to make Du'a for mercy on behalf of those engaged in Ibadah of Allah Ta'ala.

*SubhanAllah*, what an honour!
